

# Acid Neutralising Tank

VP6

- > above-ground installation.
- > typically used in laboratories and metalwork or art/craft workshops.
- > these tanks have three baffles and must be partially filled with acid neutralising marble chips.  
 The baffle arrangement forces the liquid passing through the tank to filter through the marble chips, which have the effect of neutralising the water pH balance.

Capacity litres	Dimensions mm			
	A	B	C	D
67	600	375	300	450
100	600	400	400	550
150	750	450	450	600
200	800	500	500	650
250	900	530	530	730

## Acid Neutralising Tank model VP6

- > Manufactured from 6mm PVC and/or Polypropylene (PP), this tank is suitable for above-ground installations
- > The tank is supplied with:
  - a loose fitting lid
  - three (3) equally spaced baffles
  - bracket only for Test Block
  - sampling valve socket
- > Larger tanks for above or below-ground installations are also available
- > When space limitations dictate, equivalent capacity tanks can be manufactured to order
- > Cement mortar Test Block to be supplied and fitted by Trade Waste inspector

## Other products available

- > Grease Interceptors for above-ground and pit liners for below-ground installations
- > Mixing Tanks
- > Settling Tanks (Plaster Trap)
- > Testing Sump
- > Solvent and Oil Interceptor
- > Petrol and Oil Interceptor
- > Water Storage Tanks
- > Custom Fabrication to order
- > Laboratory Sinks
- > Pot Sinks

- > Marble Chips supplied separately  
 1 x 25kg bag required per 40 litre water capacity
