

# Settling Tank

VP7

- > above-ground installation.
- > used in dental/medical laboratories and art/craft workshops.
- > this tank slows the flow of water allowing plaster, clay and other fine (heavier than water) material to sink to the bottom and cleaner water to flow out to sewer. Collected waste should be cleaned from the tank periodically.

Capacity litres	Dimensions mm			
	A	B	C	D
72	600	400	300	450
100	600	400	400	550
150	750	450	450	600
200	800	500	500	650
250	900	530	530	730

## Settling Tank model VP7

### Plaster Trap

- > Manufactured from 6mm PVC or Polypropylene (PP), this tank is also known as a Plaster Trap
- > The outlet pipe diameter should be one size larger than the inlet
- > The tank is supplied with:
  - a removable airtight cover
  - drain valve nipple
  - sampling valve nipple
  - a fixed baffle at outlet end
- > Larger tanks for above or below-ground installations are also available
- > When space limitations dictate, equivalent capacity tanks can be manufactured to order

## Other products available

- > Grease Interceptors for above-ground and pit liners for below-ground installations
- > Mixing Tanks
- > Acid Neutralising Tanks
- > Testing Sump
- > Solvent and Oil Interceptor
- > Petrol and Oil Interceptor
- > Water Storage Tanks
- > Custom Fabrication to order
- > Laboratory Sinks
- > Pot Sinks
